COST-SAVING
PRODUCT FROM
SP PRODUCTS**

Patented "Big O" Universal Box Support Bracket

**Revolutionary design allows
total flexibility for wood
and metal stud construction**

Suitable for many applications....
allowing quick mounting of 4" or 4¹¹/₁₆" shallow or deep boxes,
mud rings, wiring devices, dimmers and more....
at the same height at any location between the studs.

Fast, On-Time Delivery – 24 hours a day, 365 days a year!

- **Saves installation time:** Set the box or boxes with the screws lined up to the edge of the opening, attach mud ring to the box and tighten the screws to firmly fasten the box to bracket. Screw the bracket to the stud with two screws in the predrilled holes and you're done.

Boxes are easily adjusted between studs before or after installation...just loosen the set screws, slide the box to the desired location and retighten screws.

- **Each bracket is stamped on top and bottom with a convenient ruler** allowing preassembly of the complete units on your job-site or in your shop.
- **Available in two universal lengths to help reduce inventory.** The "Big O" Universal Box Support Bracket is available in 16" and 24" lengths and can be used to mount 4" or 4 1/16" shallow or deep boxes, devices, dimmers, mud rings, and more at the same height and at any location between the studs. Brackets made with strong 20 gauge galvanized steel.
- **A lower cost 4 x 4 gutter can be attached** allowing you to quickly gang up to 12 dimmers in a 24" space between studs. Gutter provides space for ease of terminations and better heat dissipation.
- **The "Big O" Universal Box Support Bracket will not interfere with back to back installation and is easy to reuse or relocate.** The low cost makes it even more desirable.
