

EZ Bar Hanger System

Save up to 20 minutes on each suspended ceiling installation.

The patented 2 foot and 4 foot T-bar spacing EZ Bar Hanger system is a fast, efficient way to install down lights, speaker boxes, fire alarm boxes, exit signs and more. Eliminates costly cutting and tying down of lather's channel, black iron or conduit.

Allows movement of fixtures and boxes in both directions to quickly ensure their proper alignment.

Locks them in place to prevent unwanted fixture or box movement when trimming out. Hangers are extremely strong and have no extra parts to lose or drop during installation.

Plain, folding tabs or snap-on mounting brackets, which accept our bar hangers at various heights, are available for all applications. Bar Hangers have two centered mounting holes to position speaker cans.

UL listed with a 50 lb. load rating for down light applications with the plain bracket only. Patented.

Fast, efficient installation!

Quickly feed bar hangers into fixture bracket prior to ceiling installation (see top insert photo). Slightly bend all four mounting tabs away from open "C" on channel. Snap tabs on one side of bar hangers to ceiling T-bars and then snap on the tabs to other side. Slide bar hangers along ceiling T-bars in one direction and fixture along the bar hangers in the other direction for total adjustability. Just bend tabs back to original position (see bottom insert photo) and you're ready to install trim. Bar Hangers have mounting holes at each end for supporting fixture independently of the t-bar, to meet national code.

Our EZ Bar Hanger System...

- Has a 50lb. load rating for down light applications.
- Eliminates costly cutting, drilling and tying down lathers channel, black iron, conduit, etc.
- Has no extra pieces to lose on the job site.
- Is quick and easy to install.
- Requires no special tools.
